

Devine Digital Technologies is a recently created Tech company interested in building technological solutions for the Churches (B2B) and Christians(B2C) first and then other industries.

The first its products or its flagship product is called **Q-worship**.

Much like [Proclaim | Church Presentation Software (<https://proclaim.logos.com/>)], Q-worship is an automated cloud-based presentation built specifically for churches, so they can design slides, create presentations, and record or stream sermons, without all the manual work.

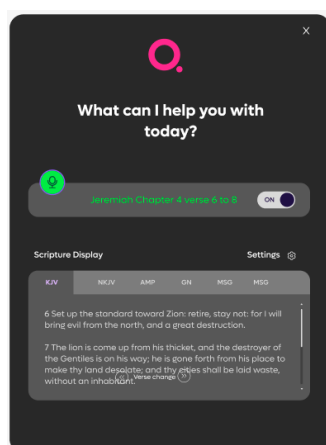

Our single differentiating factor or what's sets us apart from other players in the market like: [Proclaim | Church Presentation Software](<https://proclaim.logos.com/>), and [EasyWorship - Church Presentation Software](<https://www.easyworship.com/>) is our speech-to-text Bible (AI) companion feature.

The Q-worship speech-to-text Bible companion also called the Hands-free Bible is provided as a widget on the Q-worship platform with its very own pre-sets and controls to allow churches to customise. Once engaged or activated, this feature leverages AI to allow Pastors to search for biblical references and scripture from 6 different versions of the bible by simply giving voice commands allowing the system to fetch and project the results to a live congregation in real time.

These Bible versions include :

- i) King James Version (KJV),
- ii) New King James Version (NKJV),
- iii) Amplified (AMP),
- iv) Message (MSG),
- v) Standard,
- vi) New International Version.

How Hands-free Bible should work.

Once engaged or activated, a user in the case a Pastor simply gives a verbal command in their most natural language by mentioning certain keywords in this case Biblical scripture reference including Book, Chapter, Verse, Bible Version.

'An example of such a command may be: Pastor says 'Let's open to the book of Jeremiah chapter 4 verse 6 to 7'

In the use case above, Q-worship must work in the following Steps:

Step 1: Speech-to-text

Once the voice command is given, Q-worship must convert speech-to-text,

Step 2: Parsing , Natural Language Processing (NLP)

Q-worship must process the converted text to isolate everything that is not Bible scripture, rendering it in a format that provides only the relevant data for searching. In the use case above this data is Bible Book (Jeremiah) Chapter (4) and Verses 6 and 7

Step 3 – Bible Search

Q-worship must then search the for the Bible scripture (Book, Chapter, and Verse or Verses) in this case Jeremiah(book), Chapter 4, Verse 6 to 7 in the Bible Database

Step 4 – Project Result

Once the result is obtained, it must be projected instantly on the live display for the congregation can see in line with the controls set by admin (church) :

Jeremiah Chapter 4 verse 6 to 7

⁶Set up the standard toward Zion: retire, stay not: for I will bring evil from the north, and a great destruction.

⁷The lion is come up from his thicket, and the destroyer of the Gentiles is on his way; he is gone forth from his place to make thy land desolate; and thy cities shall be laid waste, without an inhabitant.

King James Version (KJV)

Other Functional requirements for Hands-free Bible

1) Default Bible Version:

The Default Bible Version for Q-worship hands-free Bible is the King James version or KJV. This means that in the case that a user (Pastor or preacher does not specifically mention a Bible version within their voice command, the system must default to the KJV.

In the case where a user specifies a Bible version within their voice command, e.g user says ***'Take me to the Book of Jermiah the chapter 4 from verse 6 to 7 in the New King James Version'***

In this case, isolating everything else, Q-worship must fetch the content according to the key words supplied : Book (Jeremiah), Chapter (4), Verses (6 and 7), Version (New King James Version – NKJV)

Result:

Jeremiah Chapter 4 verse 6 to 7

Set up the [standard](#) toward Zion.
Take refuge! Do not delay!
For I will bring disaster from the north,
And great destruction."

⁷The lion has come up from his thicket,
And the destroyer of nations is on his way.
He has gone forth from his place

To make your land desolate.
Your cities will be laid waste,
Without inhabitant.

NKJV

2) Version Change

Where a previous voice command has been given, the user may want to view the same result of the scriptural reference in the different Bible version. This called a version change request. They may do so by simply giving a natural language voice command asking Q-worship to show them a different version. Still using the case above where the user has requested Jeremiah Chapter 4 verse 6 to 7 in the NKJV version.

They may now want to view or see the version from the Amplified Bible (AMP) by simply saying : **'Show me the Amplified Version'**

In this case, Q-worship must maintain the Book, chapter, and verse or verses supplied in the original voice command and only fetch the new version requested, in the case AMP

Result:

Jeremiah Chapter 4 verse 6 to 7

"Raise a banner toward Zion [to mark the way for those seeking safety inside Jerusalem's walls]!

Seek refuge, do not stand [immobile],

For I am bringing evil from the north (the army of Babylon),

And great destruction.

7

"A lion has left his lair,

And a destroyer of nations is on his way.

He has gone out from his place

To desolate your land;

Your cities will be in ruins

Without an inhabitant.

AMP

3) Verse change

Where a previous / Existing command has been given, a user may change the verse by simply asking Q-worship to show them the next verse or mentioning the next verse my number.

In the use case above for instance where the user has previously made a voice command asking Q-worship to show them Jeremiah Chapter 4 verse 6 to 7 and have been provided the result, they may follow up with a verse change command such as :

'Show the Next Verse, Go to the Next Verse, or Show me Verse 8'

In this case, Q-worship intelligently interprets this as a command to keep all the other parameters the same such as : Book (Jeremiah), Chapter (4) and Version (KJV – Default) the same and simply fetch the next verse (8) and project to the live screen

Result

Jeremiah chapter 4 verse 8

⁸For this gird you with sackcloth, lament and howl: for the fierce anger of the Lord is not turned back from us.

KJV

4) Chapter Change

Much like the verse change functionality, Where a previous / Existing command has been given, a user may change the chapter by simply asking Q-worship to show a new chapter and verse number or mentioning a new chapter and verse number

In the use case above for instance where the user has previously made a voice command asking Q-worship to show them Jeremiah Chapter 4 verse 6 to 7 and have been provided the result, they may follow up with a chapter change command such as :

'Show me chapter 5 verse 3 and 4 or take me chapter 5 verse 3 and 4'

In this case, Q-worship intelligently interprets this as a command to keep all the other parameters the same such as : Book (Jeremiah),and Version (KJV – Default) the same and simply fetch the new chapter (5) and Verse (3 and 4) and project to the live screen

Result :

Jeremiah chapter 5 verse 3 to 4

³O Lord, are not thine eyes upon the truth? thou hast stricken them, but they have not grieved; thou hast consumed them, but they have refused to receive correction: they have made their faces harder than a rock; they have refused to return.

⁴Therefore I said, Surely these are poor; they are foolish: for they know not the way of the Lord, nor the judgment of their God.

KJV

5) Where the word 'Chapter' is not mentioned in voice command

In some cases, the user may not mention the actual word 'Chapter' when giving their voice command.

For instance, using the example above, the user may simply say:

Let's open our bible to the book of Jeremiah 4, the verses 6 and 7

As a general standard, where the user does not use the word 'Chapter' while giving their voice command, Q-worship must still interpret and process this as normal with Jeremiah being the book, 4 as the chapter, 6 & 7 as the verses, and KJV (Default) as the Version

Result

Jeremiah Chapter 4 verse 6 to 7

⁶Set up the standard toward Zion: retire, stay not: for I will bring evil from the north, and a great destruction.

⁷The lion is come up from his thicket, and the destroyer of the Gentiles is on his way; he is gone forth from his place to make thy land desolate; and thy cities shall be laid waste, without an inhabitant.

King James Version (KJV)

6) Where the word 'Verse' is not mentioned in voice command

In some cases, the user may not mention the actual word 'Verse' when giving their voice command.

For instance, using the example above, the user may simply say:

Let's open our bible to the book of Jeremiah 4, 6 and 7

As a general standard, where the user does not use the word 'Verse' while giving their voice command, Q-worship must still interpret and process this as normal with Jeremiah being the book, 4 as the chapter, 6 & 7 as the verses, and KJV (Default) as the Version

Result

Jeremiah Chapter 4 verse 6 to 7

⁶Set up the standard toward Zion: retire, stay not: for I will bring evil from the north, and a great destruction.

⁷The lion is come up from his thicket, and the destroyer of the Gentiles is on his way; he is gone forth from his place to make thy land desolate; and thy cities shall be laid waste, without an inhabitant.

King James Version (KJV)

7) Where the words 'Chapter and Verse' are not mentioned in voice command

In some cases, the word 'Chapter' and 'Verse' may be absent from the verbal command.

For instance using the example above, the user (Pastor) may simply say :

Let's open to Jeremiah 4, 6 to 7 Amplified version

Or

Take me to Jeremiah 4, 6 and 7 Amplified version

As a general standard, where this is the voice command is given in this nature, Q-worship must interpret it as normal, with Jeremiah being the book, 4 as the chapter, and 6 & 7 as the verses, and Amplified (AMP) as the Version

Result

Jeremiah Chapter 4 verse 6 to 7

"Raise a banner toward Zion [to mark the way for those seeking safety inside Jerusalem's walls]!

Seek refuge, do not stand [immobile],

For I am bringing evil from the north (the army of Babylon),

And great destruction.

7

"A lion has left his lair,

And a destroyer of nations is on his way.

He has gone out from his place

To desolate your land;

Your cities will be in ruins

Without an inhabitant.

AMP

8) Low Latency: <0.2 Secs

To boost user acquisition, we must reduce latency to almost zero. The time between which a user gives a voice command and when it is projected to the live screen must be almost instant

9) Putting Q-worship to sleep mode

A string of words such as: **OK, Thank you, Great, That's Fine**, etc should trigger the end of an active session and put Q-worship speech to text Bible voice command to sleep or out of listening mode. The text should also disappear from the live screen once these words are said signifying the end of an active session and waiting for the a new command.

10) Waking Q-worship up

If Q-worship has been set to listening mode, given that the Bible book will be present in all voice commands, any voice command that mentions a bible book should activate voice command or wake it up. However If this is not followed up with an actual command (such as chapter and verse), then it is not deemed to be an active voice command.

11) Bible Books starting with numbers

1 Samuel - Pronounced as 'First Samuel' in voice command

2 Samuel - Pronounced as 'Second Samuel' in voice command

1 Kings - Pronounced as 'First King' in voice command

2 Kings- Pronounced as 'Second Kings' in voice command

1 Chronicles- Pronounced as 'First Chronicles' in voice command

2 Chronicles- Pronounced as 'Second Chronicles' in voice command

1 Corinthians - Pronounced as 'First Corinthians' in voice command

2 Corinthians - Pronounced as 'Second Corinthians' in voice command

1 Thessalonians- Pronounced as 'First Thessalonians' in voice command

2 Thessalonians- Pronounced as 'Secon Thessalonians' in voice command

1 Timothy- Pronounced as 'First Timothy' in voice command

2 Timothy- Pronounced as 'Second Timothy' in voice command

1 Peter- Pronounced as 'First Peter' in voice command

2 Peter- Pronounced as 'Second Peter' in voice command

1 John- Pronounced as 'First John' in voice command

2 John- Pronounced as 'Second John' in voice command

3 John - Pronounced as 'Third John' in voice command
